Supported Living and Live in Services

About Us

Parkhill Support Services provides support to people who need assistance to remain independent within their own homes.

We provide a range of personalised care and support services to assist people with their daily activities.

Our personal care assistants and support workers are directly employed by us and are continuously assessed and provided with ongoing training to ensure skills and working practices are up to date.

Parkhill Support Services will guide you through the process of choosing the right care package for your needs and will adapt your service to accommodate any changes required.

> Step Down

The service accepts mental health clients who are preparing for discharge from long or short stay inpatient hospital admission (Acute, Rehab, forensic units) as a transitional service to support them as they prepare for independent living in the local community. We encourage a degree of positive risk taking to increase service user confidence and move towards their goals in small, measurable and achievable milestones.

> Live In Care

This service is designed for people with mental health, learning and physical disabilities, or elderly people living with Dementia. The benefit of live in care is staying in the comfort and familiarity of your own house with a full-time Parkhill Support live in carer supporting you to do things that needs to be done and being a full time companion. This is a perfect solution for those people who understand they require support and value their independence and want to remain in their own home environment.

> Who are we?

Parkhill Support services provides wide range of community services focusing on promoting good quality of life facilitating independence and recovery. We support and care for adults with various mental health, physical health and Learning Disabilities and their families.

Our services are based in local communities and are provided in partnership with various stake holders including Local Authorities, NHS Trusts, CCGs, other providers and most importantly our clients.

> What do we do?

Our services are person-centred, we promote social inclusion, challenging stigma and encouraging participation and re-integration into the wider community promoting what's possible for the individual e.g. Education or and employment.

At Parkhill Support services "we don't see problems, we see possibilities" we help the people we support to be as independent as possible try new things and fulfil their potential.

> Supported Living

This service offers the people we support an opportunity to live where and how they choose, in their own home or people they choose to live with. We work in partnership with housing providers to make this possible. The accommodation is based in local communities and our team of support workers follow individual support plans to provide people with support they need during the day and if necessary at night. This means people we support can do things in their local communities-like going shopping, going to church, using public transport, do as much as they can for themselves including cooking, shopping, budgeting and personal care.
